SUMMARY

Developer with a talent for creating and implementing multi-faceted projects, coordinating groups by adapting to the strengths of others, ensuring quality by documentation and regular review, and maintaining consistently clear communication. During the LaunchCode course many new skills were improved upon including problem solving through programming, working with Java to develop backend functionality, and collaborating on coding projects with others through GitHub. Pursuing a career in tech that focuses on software development while contributing to an established organization rooted in excellence.

LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, ReactJS | Spring Boot, React, Bootstrap | IntelliJ, MySQL Workbench, Visual Studio Code

EXPERIENCE

Well Coffee Inventory App — LaunchCode Capstone Project

- An online inventory tracking and restocking application that allows users to create an inventory log where they can record, review, and purchase items
- Developed a SQL database that includes staff information created in the web application
- Designed functionality to discount items based on the user's choice while providing feedback in the application of the change in price
- Created the option for users to leave comments for inventory items that were then stored in the database
- MySQL, Java, Spring Boot, Amazon API, React

Associate Minister — First Christian Church of Wood River

October 2016 - Present

- Manages over 30 team members who carry out multiple tasks that help the church function efficiently
- Maintains internet functions as the acting network administrator and updates hardware/software to meet the needs of congregants and staff members
- Regularly updates the church website and makes audits to ensure the site is well-maintained
- Onboards volunteers by providing mentorship personally or through other trained leaders
- Equips staff members with technology through IT assistance ranging from addressing software problems, by training staff personally, or by providing tailor-made documentation

Graduate Assistant — Southern Illinois University Edwardsville

August 2016 - May 2017

- Prepared and proctored examinations as designated by class professors
- Taught undergraduate level courses to groups of 4+ students
- Graded examinations and assignments by collaborating with professors about requirements
- Returned assignments to students in accordance with established deadlines
